About Responsible Care Programme

Responsible Care is the chemical industry's global initiative to continuously improve its operations in terms of health, safety, environment and security standards and performances.

The Singapore Chemical Industry Council Limited (SCIC) adopted Responsible Care in 1990 and continues to actively lead the chemical industry in achieving Responsible Care initiatives. Annually, various programmes such as training workshops, induction briefings, best practices sharing seminars and other outreach efforts are conducted to further advocate Responsible Care to the chemical industry and beyond.

Through Responsible Care, the chemical industry in Singapore can make a valuable contribution to the sustainable development and improvement of lives and the environment.

About the Responsible Care Awards

The SCIC Responsible Care Awards was launched in 2001 to recognise the efforts of companies who have committed to practice and implement the 7 Responsible Care Codes of Management Practices. These Codes of Management Practices are:

- Community Awareness & Emergency Response
- Distribution
- Employee Health & Safety
- Pollution Prevention
- Process Safety
- Product Stewardship
- Security

Each year, the submissions by the Responsible Care member companies would be reviewed by a panel of judges comprising representatives from the industry as well as statutory agencies of the Ministry of Manpower, National Environment Agency and the Singapore Civil Defence Force. The submissions from all Responsible Care member companies are reviewed based on the categorisation of the three main business operations: Manufacturers, Logistics & Service Providers and the Traders.

Following the review, companies are then short-listed through a series of clarification meetings and site visits before the judges eventually decide on the winners and recommend them to the SCIC board for endorsement.

SCIC Responsible Care Awards 2023 is proudly sponsored by Advario Asia Pacific Ptd Ltd.
